

Saint Louis University

Partnering with government and non-government institutions in support of the local community

3 GOOD HEALTH
AND WELL-BEING

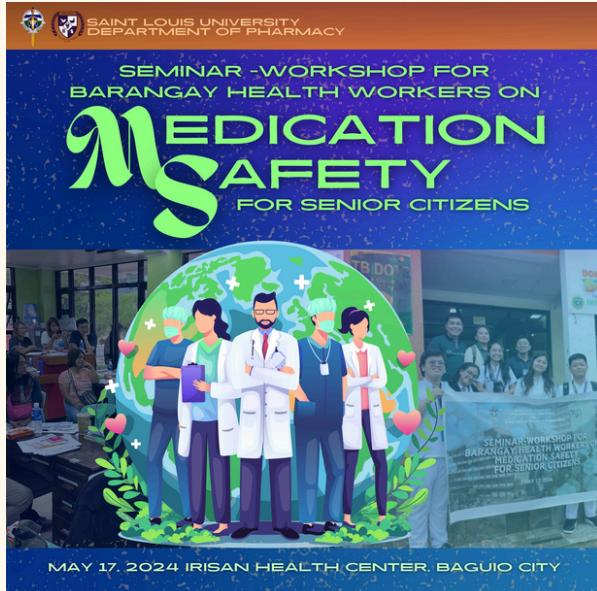

Saint Louis University

Collaboration and Health Services

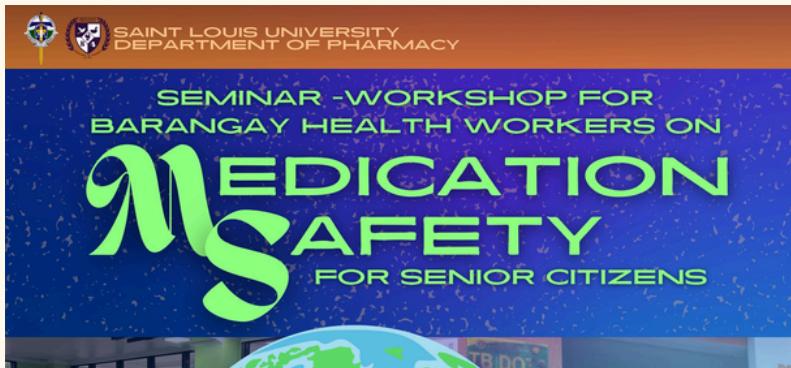

Saint Louis University collaborates with governmental and non-governmental organizations to implement programs and initiatives that benefit the general population of the city and the wider Cordillera Administrative Region (CAR), all in pursuit of a clean, safe, and healthy community. The university has also partnered with a higher education institution in Thailand that specializes in health science innovations, providing students with exposure to advancements in healthcare and the diverse health challenges faced by communities outside the Philippines.

The university is dedicated to supporting society and providing hope to the local community, a commitment rooted in its core value of social involvement.

Saint Louis University implements Medication Safety campaign for Senior Citizens in cooperation with Barangay Health Workers

Geared towards educating the community regarding medication safety, the Department of Pharmacy of Saint Louis University collaborated with the largest Barangay in Baguio City, the Irisan Barangay through the Irisan Health Center and the Barangay Health Workers (BHWs).

This activity was intended to educate the BHWs to medication safety for senior citizens. The carefully crafted program equipped these frontline workers with the knowledge and skills needed to effectively manage medications for the elderly, a group that is often at risk for medication errors and adverse drug reactions.

SLU School of Medicine and School of Law collaborate with local organizations to offer health services to more than 1000 Baguio residents

To enhance awareness and prevent diabetic retinopathy and other vision-related conditions, the Rotaract Club of Baguio SLU-School of Medicine (SLU-SOM) engaged in screening initiatives at Brgy. Irisan in June 2024. In collaboration with the Philippine Academy of Ophthalmology (PAO) - North Western Luzon Chapter, Rotaract volunteers of the SLU School of Medicine facilitated a Diabetic Retinopathy Screening event that included educational lectures, comprehensive eye check-ups, and the distribution of free reading glasses to 48 local residents.

This collaboration between SLU and the PAO, which is the national ophthalmologists association, underscored the importance of raising awareness within the community about diabetic retinopathy, particularly for individuals with diabetes who are at a heightened risk of vision impairment. By identifying and detecting potential issues early, such initiatives can significantly improve management and treatment options, ultimately reducing the risk of visual impairment and enhancing the quality of life for those affected.

Strengthening Health Collaboration: Huachiew Chalermprakiet University exposes SLU student interns to innovations in health sciences in Thailand

In a significant step toward advancing health education and collaboration, interns from Saint Louis University (SLU) have been privileged to attend an internship program at Huachiew Chalermprakiet University (HCU), a higher education institution in Thailand specializing in health sciences innovations.

In a remarkable display of dedication and competence, interns from the Bachelor of Science in Pharmacy program at Saint Louis University (SLU) participated in a pharmaceutical manufacturing internship at the Faculty of Pharmaceutical Sciences, Huachiew Chalermprakiet University, from January to February 2024.

From June to July 2024, interns from the Department of Medical Laboratory Science of Saint Louis University were warmly welcomed by Huachiew Chalermprakiet University, where they immersed themselves in the practice of Medical Laboratory Science. This unique opportunity allowed them to gain invaluable insights into world-class transfusion medicine procedures and explore diverse community health outcomes. During their visits to local communities, they experienced firsthand the varied health conditions affecting different populations, deepening their understanding of the critical role they will play in improving healthcare on a broader scale. This hands-on experience not only enriched their education but also ignited their passion for making a meaningful impact in the field of health.

This collaboration between SLU and Huachiew Chalermprakiet University reflects a shared commitment to enhancing healthcare education and fostering international partnerships. By exposing interns to real-world applications of their studies, both institutions are preparing the next generation of healthcare professionals to meet the challenges of modern medicine.

As health education continues to evolve, initiatives like this not only strengthen academic ties but also promote a deeper understanding of essential health practices that can benefit communities on a global scale. The experience gained during these visits is expected to inspire the interns to contribute meaningfully to the healthcare sector upon their return to their respective universities.
